

Great Tools = Great Results

At PTI we teach how use beneficial colors of Light to generate fast, systemic healing responses from the body. No horseman should ever be without a Torch for calming and dealing with the everyday bumps & bruises of equine life.

The more you target your Light, the more the brain knows what you are asking it to address. The best results come from knowing WHERE to Shine YOUR Light.

Red⁺2 - 660 & 850nm

Includes the benefits of Red & Near-Infrared!
Pain-Relief & better Circulation with Deep Penetration
