

Expand Your Wellness Plan with Inlight's Family of Green LED Light Therapy Pads

Inlight's Green LED Light Therapy Pads provide versatile options for those seeking the benefits of photobiomodulation (PBM) therapy. Designed for comfort and broad coverage, these soft, flexible neoprene pads each feature an array of embedded LEDs with elastic *hook-and-loop* straps for adaptable applications. An Inlight Controller is required and sold separately. Includes a two-year warranty.

**Improves
Skin Health**

**Speeds Up
Wound Healing**

**Reduces Pain
Acute & Chronic**

**Helps Reduce
SAD Symptoms**

Therapeutic Effects of PBM: This nonthermal process yields therapeutic benefits, including pain relief (*acute and chronic*), improved circulation, inflammation reduction, facilitation of wound healing, improved skin health (*especially inflammatory conditions*), tissue regeneration, and helps reduce Seasonal Affective Disorder (SAD) symptoms.
