

## The Inlight Cap 525 Red/NIR Pad

The Inlight Cap 525 Red and Near-Infrared (NIR) LED pad is designed for comfort and versatility, it fits easily over the head for various applications, making it a popular choice. It delivers powerful photon energy for individuals seeking pain relief, improved circulation, tissue regeneration, and overall wellness through the therapeutic benefits of photobiomodulation (PBM).

An Inlight Controller is required and sold separately. Includes a two-year warranty.

Improved  
Circulation

Inflammation  
Reduction

Improved  
Lymphatic Flow

Reduces Pain  
Acute & Chronic

**Therapeutic Effects of PBM:** This nonthermal process yields therapeutic benefits, including pain relief, improved circulation, inflammation reduction, modulation of the immune response, and facilitation of wound healing and tissue regeneration.

- The Inlight Cap 525 fits comfortably on the head and is powered by (2) port cables, easily connecting with all Inlight Therapy controllers.
- The combined LED array is embedded into a soft, flexible neoprene pad for adaptable application opportunities.
- The Inlight Cap's **525** diodes, featuring **236** Red diodes (630 nm) and **289** NIR diodes (850 nm) promote PBM by combining red and near-infrared (NIR) photon energy over non-ionizing wavelengths.
